

Make 2026 Your Best Year in Trading

Add One Proven & Tested Trading Strategy

to potentially add an average

of INR 60,000 to 1,00,000 per trade

(Trading 2 lots of Silver Mini requires 6–7 lac capital (6 lac base + 1 lac additional), adjustable to a minimum starting capital of 60K with proportional result adjustments)

In the next one weeks we'll build you a custom monetization path without:

- Bleeding capital through impulsive, revenge trades that erase weeks of effort in minutes.
- Living on emotional whiplash—confidence in the morning, self-disgust by market close.
- Being forced to overtrade just to 'make something happen' because your system doesn't pay consistently.

3 Quantmade Research Innovation

Get access to our proven Research based Innovation

The Silver-Swing trading model ensures that your capital is not exposed to unnecessary risk by only engaging in high-conviction trade setups.

Each trade undergoes a rigorous process, validated by three distinct checkpoints before and after execution.

- ☑ The “Rising Window” → lower the chance of false move by 70-80%.
- ☑ The “Ditch Switch” → Instead of being a victim of manipulation use it in your favour.
- ☑ The “Gaussian Process Regression (GPR) model” → Allow perfect timing to trailing stop so that you reduce the risk, yet reduce the chance of premature exit.

SUPPORT

- **Review Call per week:** to execute, plan, cut what doesn't work and double down on what does.
- **Private Chat:** Direct access to whatsapp for daily guidance and feedback
- **Co-Trade:** Private Whatsapp group to get guidance at each stage of the trade execution.
