

Get 70–80% Hit Rate with the Accuracy Fix TradingView Indicator

Avoid false signals — and the frustration that follows, forever

**Enter at the right time:
book the profit. Enter at
the wrong time: take the loss.**

What's Included?

- ✓ **Step-by-step guide on how to use Accuracy Fix to trade with 70–80% precision** — You'll learn exactly what to look for and when to act.
- ✓ **Crystal clear instructions on how to add Accuracy Fix to your TradingView chart in 30 seconds** — no coding, no upgrades, and no extra tools required.
- ✓ **The “Change, Pause, Jump” Method of Entry** — so you only take trades with 70-80% accuracy (and not just another frustrating false entry).
- ✓ **How to avoid the #1 mistake traders make** that kills their confidence and destroys winning streaks (and how Accuracy Fix keeps you away from it by design).
- ✓ **The perfect condition formula:** — and what that means for aggressive entries with higher probability.
- ✓ **How to use Accuracy Fix across to improve timing and reduce hesitation** — especially powerful when swing trading fast-moving instruments.

Verified Accuracy:

The full backtest — with date and time stamps — proves it:

Every time the Accuracy Fix crossed above +80, we tracked the result in Nifty Future

Yes, 77% of the time, it led to a winning trade.

You can check it yourself on any past chart.

Or if you'd like, I'll show you **each setup — one by one**. Confidence comes from proof.

 **Bonus #1:**

"No Fakeout Formula" Cheat Sheet

Get our printable logic sheet that shows exactly when Accuracy Fix *ignores* the market noise — and why that's your secret weapon.

 **Bonus #2:**

"Trade Like a Spy" Entry Map

You'll learn how to read your chart like a slope spy — spotting hidden signs of momentum buildup before anyone else sees the move coming.

 **Bonus #3:**

"Confidence Trigger Map"

A one-pager that shows exactly what to do when Accuracy Fix plots **+75** or **-75*** — so you don't second-guess the setup, hesitate on entries, or exit too early. Perfect for building trade confidence and consistency.

If you don't know how to get 70–80% accuracy, expect:

- Constant second-guessing before every entry.
- Jumping in late — and exiting too early.
- Following fake breakouts that collapse minutes later.
- Emotional trades based on hope, not confirmation.
- Revenge trades trying to “fix” your last bad one.
- Confusion from too many indicators and no clear signal.
- That one painful loss wiping out 5 small wins.
- Regret every time you skip a clean setup.
- Low confidence that kills consistency.
- A trading plan that *feels good* — but doesn't work.

Is Now a Good Time to Fix Your Accuracy in Trading?

Yes — it's overdue.

Not knowing how to get 70–80% accuracy in trading is like entering the battlefield blindfolded.

You're acting, you're trying... but you're doing it without confirmation.

And that's why you're stuck.

False signals don't just cause losses.

They **shake your confidence**, waste emotional energy, and make every next trade feel like a coin toss.

That ends now — with the **Accuracy Fix TradingView Indicator**.

**Remember! Enter at the right time: book the profit.
Enter at the wrong time: take the loss.**
