## **Co-Trade The Accuracy Fix Trading Model We are Trading to Get 70-80% Accuracy**

**Close more profitable trade- Over and over again - trading in your spare time**

So, you create more freedom with your money and get inner satisfaction from your trading

### **What is a Co-Trade Implementation program?**

Hyper personalised experience to implement a trading model with a goal to get 70-80% Accuracy, so you can close more profitable trades -over and over again - trading in your spare time.

We'll co-trade (we will take and show you exactly what to do at each stage taking the same trade ditto the model in our side account)

### **How is Co-Trading different from anything you have seen so far?**

Most trading mentorships give you a strategy on paper, flash a few past chart examples, and then leave you to struggle alone in live markets.

That's like learning to sing while your teacher stays silent and just hands you the lyrics — it doesn't work. We do it differently.

When you learn with us, we don't just tell you what to do – we take the exact same trades in our own side account and share the proof with you.

It's a real, transparent, and fastest way to trade.

Just like a music teacher sings with you to help you hit the right notes, we trade alongside you so you can learn faster, build confidence, and implement your system smoothly.

So it feels natural to stick to a plan and simple to scale.

- No course that teaches you and leave you alone
- No frustration what doesn't feel true to you
- No stressing or guessing (or hoping)

Here's what we'll implement in the next 4 weeks:

## Co-trading the foundation:

---

### 1. **Build the Skill to Trade with 70-80% accuracy**

We won't just tell you what to do - we'll shift how you find 70-80% accurate trade.

So it feels natural to trade, confident to take the next trade, and actually close more winners without you running out of capital losing more often, to lose more again and again hitting financial stress every time you start fresh.

#### **What not to expect:**

Any gimmick, lack of transparency, or faking things.

#### **What to expect:**

→ Learn how we identify more than ideal market conditions set for rally 70-80% accuracy by applying

**Z Score accuracy fix confidence signal, Jump-Change-Pause entry rule, The safest trailing stop method that is not too tight nor too broad to avoid premature exit or giving back the paper profit, ready to trade from next day.**

→ A custom printable trade plan tree - so you know exactly what to trade, when to trade it, why it is 70-80% accurate, and how to exit.

→ Learn how to allocate capital in only 4 markets - Nifty Future, Crude Oil, Gold Mini, Bitcoin.

→ Get access of all invite only tradingview indicator, tracker, VIP chat and call support as and when needed

## **2. Implement the skill to Trade with 70-80% in live experience**

We believe the fastest way to master trading is by doing it *with* someone who's actually trading – not just teaching theory.

That's why in our Co-Trade Implementation sessions, we don't just explain strategies – we take the exact same trades on our side account and share the proof with you. This real-time, real-money approach helps you gain confidence, understand execution, and eliminate hesitation.

It's like learning a musical instrument – you don't just read sheet music; your teacher plays right beside you. We trade with you, not above you.

**What not to expect:**

No trading strategies dumped on you, No hindsight chart lectures disconnected from live market flow, No fake trade calls or “backtested only” systems, No follow trades blindly – this is implementation, not signals.

### **What to expect:**

- Real-time trade execution *with* you – not just instructions.
- Same trades taken on our side account (proof included)
- Live decision-making to help you build execution muscle
- Clear explanation of the “why” it fit with our plan
- Accountability to implement your own trading system

## **3. Continue To Co-Trade (Confidence + Satisfaction)**

It said knowing what to do in trading and doing what to do in trading is not the same.

Most traders fail because they do not show up when it's the action time.

Co-Trade designs a delivery setup that feels simple, scalable, and actually exciting to show up when it's the action time.

Because we will show up with our trade in side account to tell you “We have taken the action - Now its your turn”

One that gets real results, keeps you stay in the game, and makes your trading feel lighter (not heavier) as you grow.

### **What not to expect:**

Making trading practice feel heavier, Lack of accountability, Ghosting and not answering your question promptly, Not getting help when you need it.

### **What to expect:**

- Co-Trade Learning Model – so you feel supported from day one and know exactly what to do without needing to ask 10 times.
- A weekly fulfillment SOPs – to track progress, show ROI, and keep momentum
- A delivery timeline builder – to map out the first 30/60/90 days and eliminate “what’s next?” guesswork.

## Quick heads-up:

# How We are Getting 70–80% Accuracy (The Skill You can build & Implement in Co-Trade Program)

---

You will close more losing trade if you open a trade during any of this condition

1. Ideal – Market Condition”
2. Less than Ideal–Market Condition”

A ideal – Market condition is when market move little up and then move little down

A less than Ideal–Market Condition is when Market move big up in quick period and then give up all the gain and quickly turn down – big (quickly)

In both these conditions opening a trade you lose money.

In third condition

3. MORE than Ideal – Market Condition

Is the time to open the trade if you want to get 70–80% accuracy.

A MORE than Ideal Condition is the condition when market do two things

- A. It move slowly but steadily
- B. It move in trend - and that trend stay long

But, how do you identify such a condition?

Before answering how, let recap the point here

To get 70-80% accuracy you can not open trade any time with your trading strategy, signal, indicator, technical analysis, AI tolls, or anything you can think about.

Because they are giving you a signal based on the mathematics behind them.

Market don't care what math or logic you are applying

So you need a reference point.

Reference point = the point when you are pulling up the chair to lean into your screen or chart.

Its MORE than Ideal -Market Condition

But how?

Using our "ACCURACY FIX - 70-80% Confidence Level" Indicator

Lets check a real example

Notice two point,

1. Accuracy fix line move from - 85 to +85 in straight line like a 'Z'
2. A +85 appears on the chart

Here is the trade result

B/S	Name	Product	Qty	Avg Price	LTP	P&L	% Change	Action
S	NIFTY AUG FUT NSE	Normal	- 75	24,701.00	24,674.00	2,025.00	+0.11%	X
						Total P&L:	₹ 2,025.00	

Download as CSV

Closed Closed 1 In Profit 1

Name	Product	Qty	Buy Avg Price	Sell Avg Price	LTP	P&L
GOLDM SEP FUT MCX	Normal	1	98,846.00	1,00,391.00	1,00,329.00	15,450.00
						Realised P&L: ₹ 15,450.00

Download as CSV

If you check the difference between Buy Avg and Sell Avg then you will notice its around 1500 gold points.

Now lets check another result

Notice two point,

3. Accuracy fix line move from - 85 to +85 in straight line like a 'Z'
4. A +85 appears on the chart

Here is the trade result

Today's Positions <span>Live</span> P&L: ₹ 37,777.50 <span>Open: 1</span>									
Open	P&L	Open	In Profit						
<input type="checkbox"/>	B/S	Name	Product	Qty	Avg Price	LTP	P&L	% Change	Action
<input type="checkbox"/>	B	GOLDM SEP FUT MCX	Normal	+1	98,500.00	98,705.00	2,050.00	+0.21%	X
							Total P&L:	₹ 2,050.00	
Closed <span>Closed 2</span> In Profit <span>2</span>									
<input checked="" type="checkbox"/>	C	CRUDEOIL AUG FUT MCX	Normal	1	5,771.00	5,992.00	6,002.00	22,100.00	✓
<input checked="" type="checkbox"/>	C	NIFTY AUG FUT NSE	Normal	150	24,834.95	24,925.80	24,951.60	13,627.50	✓
							Realised P&L:	₹ 35,727.50	

If you check the difference between Buy Avg and Sell Avg then you will notice its around 200 + points in Crude.

Now lets check another result

Notice two point,

5. Accuracy fix line move from + 85 to - 85 in straight line like a 'Z' (also notice when the line not move from one band to other band its not a trade)
6. A -85 appears on the chart

Here is the trade result

Today's Positions Live P&L: ₹ 28,067.50 Open: 2

Open P&L Open: 2 In Profit: 2

B/S	Name	Product	Qty	Avg Price	LTP	P&L	% Change	Action
B	CRUDEOIL AUG FUT MCX	Normal	+1	5,771.00	5,910.00	13,900.00	+2.41%	X
B	GOLDM SEP FUT MCX	Normal	+1	98,500.00	98,554.00	540.00	+0.05%	X

Total P&L: ₹ 14,440.00

Closed Closed: 1 In Profit: 1

Name	Product	Qty	Buy Avg Price	Sell Avg Price	LTP	P&L
NIFTY AUG FUT NSE	Normal	150	24,834.95	24,925.80	24,951.60	13,627.50

Realised P&L: ₹ 13,627.50

# Formula to Get 70–80% Accuracy

**Close more profitable trade– Over and over again – trading in your spare tim**

So, you have more freedom with your money and control over your time

1. Do nothing – Wait
2. Lets Accuracy Fix to move from -85 to +85 in straight line or the opposite
3. Use the trigger format Jump – chang – Pause
4. Place initial stop
5. Trail stop to exit

## What you get + support:

---

**This isn't course. It's co-trade.**

**We don't watch from the sidelines.**

We step into the trenches with you –

This is hands-on, personalized implementation designed to move fast, cut confusion, and compound results.

Here's how that plays out:

-  **Strategic Blueprint Call** – We start by unpacking your situation, time, and trading targets, then map the trading plan that gets you there. You'll leave with a custom blueprint, clear milestones, and full clarity on what to execute (and what to ignore).
-  **+ 2 Implementation Training** – A 1.5 hrs. Recording video explaining the system
  - The key to get 70–80% accuracy

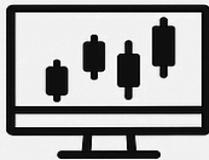

- Why you do way better focusing on 4 Non-Correlated Market
- The **“Accuracy Fix Indicator - 70-80% confidence level”** breakdown
- The Reference points - know exactly when you need to show interest in trade.
- The **Jump-Change-Pause** technique to enter a trade
- The **“Impossible balanced - Trailing stop”** is never too tight so you exited early and save you from any quick reversal by locking most of the gain.
-  **On-Demand Support (24/7 Chat)** - You'll have direct line access for fast feedback, quick reviews, and clarity whenever you hit a decision point. No waiting. No spinning.
-  **Execution Reviews (Looms + Voice Notes)** - Looms, voice notes, and targeted strategy feedback not just theory, but hands-on refinement to keep things moving.

# Private Chat + Co Trade

## LEARN

Understand the system rules and logic

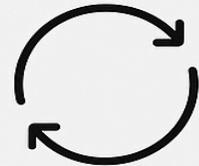

## CO-TRADE

Follow real-time trades from our side account

## GET 70–80% ACCURACY

See the strategy in action with consistent results

## GAIN CONFIDENCE

Execute your own trades with clarity and control

1. You'll receive step-by-step updates — from order placement to trade management and exit — all based on our side account.

2. Every move is recorded and shared with you, so you can see exactly how the 70–80% accuracy model works in real trades.
3. Just follow along, learn the process, and implement it with confidence.

## **Investment?**

---

Total investment for co-building your system is INR 4,50,000.

With 2 payment options available:

- Monthly plan: 1,50,000/month for 3 months
- Pay in full: 2,40,000 upfront (save INR 2,10,000)

## **Guarantees?**

---

It definitely works. No false promises. 9 Month Refund policy

But, your results are a reflection of your execution.

We'll co-trade the full system - you bring the commitment.

## **What's next?**

- 
- If you're in - amazing. Let's get this thing started. Join below.
  - If you've got questions - hit reply and ask away.
  - If you're out - that's okay too. But I'll be real with you...

With the way this is created, the results we're seeing, and the systems we've got in place it's worth finding a way to join.

You've come this far for a reason.

## Steps to enroll:

---

(August spots: 2 left)

1. Reply back to our DM or Email saying "I'm in".
2. I'll send over the link to join inside
3. Book the first 1:1 call and get started

Below are some common Qs and recent results.
